

# We're powering business and industry

## Solar Professionals *Making the sun your asset*

### Our difference

Solar Professionals are among only a handful of industry professionals with experience in both design, construction and project management of small to large scale commercial solar projects across regional NSW.

Our company is a grass roots company, owned and operated from Wagga Wagga and we are not a franchise. Importantly, we are accredited solar system designers and installers, licenced electricians and roofing plumbers and we are also carbon management specialists. All aspects of design and installation are handled by our specialist team.

Our company can offer you a cost effective local solution to your energy requirements thus removing the need to out source to contractors in metropolitan areas.

Our solar energy solutions are developed, managed and implemented with the aid of:

- Accurate predictions using industry-leading power system modelling tools that compare yields for individual sites and provide comprehensive information for precise feasibility evaluations.
- Financial modelling that reflects user tariffs and captured value.
- Perfect scheduling and ordering to ensure that installation schedules are always met.
- Zero upfront capital outlay arrangements are also available under our Electricity Supply Agreement.

Medium and large scale energy solutions require diverse and specialist skills, and Solar Professionals team is experienced in all facets of those projects, ensuring every project is of the highest standard to deliver maximum efficiency and effectiveness. Specialists in the design and construction of solar PV installations, Solar Professionals provides creative

and practical solutions for new applications. Each design and installation is tailored to your unique site considerations and measured against actual power delivered and energy per dollar invested.

Solar Professionals has recently joined with the Kenjarhy Group to establish Kenjarhy Solar. Kenjarhy Solar is one of the only indigenous owned solar companies in Australia and one of the only indigenous solar companies listed on the supply nation database. Kenjarhy Solar was created as a vehicle for Indigenous communities to achieve employment and training opportunities that are being presented in the renewable energy sectors. It allows our company to have a real impact on communities in developing these initiatives.

Kenjarhy Solar offers commercial business, government and industry a cost effective solution to energy requirements, whilst employing and training indigenous people during the process and satisfying economic, social & environmental as a triple bottom line.

### Our experience

Solar Professionals experience includes:

- 226KW** (stage 1) Kotzur solar PV project, Walla Walla
- 200KW** Wagga Motors solar PV project, Wagga Wagga
- 99.84KW** The Haven Aged Care Facility solar PV project, Wagga Wagga
- 99.84KW** Junee Ex Services Memorial Club solar PV project, Junee
- 99.84KW** Wellington Soldiers Memorial Club solar PV project, Wellington
- 99.84KW** Robin Hood Hotel solar PV project, Orange
- 80KW** Centrepont Building solar PV project, Griffith
- 74.88KW** (stage 1) Langfields Pastoral Company solar PV project, Kingsvale
- 66KW** Crouch Transport solar PV project, Wagga Wagga
- 60.8KW** Ellwood Detail Joinery solar PV project, Queanbeyan
- 60KW** Orange Aboriginal Medical Service solar PV project, Orange
- 50KW** Wagga Trucks solar PV project, Wagga Wagga
- 40.5KW** Bush & Campbell Accountants solar PV project, Wagga Wagga
- 40KW** Yoogali Engineering solar PV project, Griffith
- 40KW** Riverina Lift Trucks solar PV project, Griffith
- 35KW** Leeton Shire Council solar PV project, Leeton
- 30.12KW** (stage 1) Balranald Shire Council solar PV project, Balranald
- 30KW** Department of Education & Communities Wewak School solar PV project, Albury.

And well in excess of 2.5MW's (2500KW) of small scale solar installations at local residential and rural properties.

Your solar project, our experience.
